What is Ultra Short Throw?

An Ultra Short Throw projector isn't only about throw distance; it's a combination of features that make it stand out from ordinary short throw projectors. Extremely short throw distances often result in distorted and poor image quality, but not the Ultra Short Throw. Hitachi's Ultra Short Throw projector achieves the optimum balance between throw distance and image quality.

- Ultra in picture quality
- Ultra in installation
- Ultra in connectivity
- Ultra in flexibility
- Ultra in performance features

Easy installation and adjustment

The wall mount ensures that the projector can be installed in exactly the right position. The entire unit slides horizontally and fine adjustments can be made to each axis independently.

- 1. Fix wall plate to wall.
- 2. Fit boom to wall plate.
- 3. Slide projector (with bracket attached) on to boom arm.

Easy remote control installation and adjustment

Hitachi innovations extend to installation and operation features that ensure quick, easy and flexible setup. The powered focus and zoom and the eight point Perfect Fit function, all of which can be operated via the remote control, to enable rapid installation but also easy post-installation adjustment of settings.

Versatile connectivity

These projectors provide a wealth of connectivity options. You can connect a variety of devices, to support all your projection needs. From DVD players and PCs to a wireless network, a Local Area Network or a simple mouse connection, Hitachi has done everything possible to ensure easy versatile connections that make your projector do more for you.

2 x HDMI input

HDMI provides completely digital connections, ensuring that lessons and presentations can be delivered with the highest image quality.

Ultra Short Throw LCD Projectors

The ideal solution for any education or corporate environment

Hitachi Ultra Short Throw projectors help you get the most out of your lessons or presentations.

Ultra Short LCD projectors that combine exceptional image quality and advanced features in a class-leading light, compact design that incorporates a fixed mirror. This range of Ultra Short Throw projectors offer exceptional usability and easy access to powerful features.

Ultra picture quality with 5000:1 high contrast ratio

Perfect Fit

The enhanced Hitachi Perfect Fit now incorporates eight point adjustment which includes all four corners and sides. This intuitive feature helps make correcting complicated or geometric distortions caused by imperfections in screen flatness as quick as possible.

Daytime Mode

Projected images may sometimes be difficult to see under bright lighting. The Daytime Mode uses image quality correction technology to counter the effects of light, ensuring clear,

No glare or shadows

Traditional projectors dazzle people, Hitachi's unique Ultra Short Throw Technology means if you stand in front of the projector the light beam won't shine in your eyes.

Accentualizer

Hitachi original technology makes pictures look more real by enhancing (1) Sharpness, (2) Gloss and (3) Shade to make pictures as clear as pictures on a flat-panel device. You can also adjust the effects by three

levels according to your surroundings so that the colours of projected images are true to life.

HDCR (High Dynamic Contrast Range)

When average projectors are used in bright rooms, the darker colours of an image deteriorate and the image becomes less clear. Using HDRC, blurred images caused by room lighting or outside light

sources are corrected and an effect similar to increasing contrast occurs. This result is a clear image even in bright rooms.

Ultra performance features

HDCR + Eco Mode

Compatible with Hitachi Solution products

All new Ultra Short Throw models are fully compatible with our innovative Hitachi Solution products*, which enhance interactivity, simplify installation and easily accommodate multiple devices with complex connections. With 2 USB type A inputs both the optional wireless adapter and one of our Solution products can be used simultaneously.

Ultra wireless connectivity

Wireless capability and network functionality

Hitachi's range of Ultra Short Throw projectors allow you to connect to your wireless network, letting you run lessons or presentations wirelessly from your laptop. The USB wireless adapter enables the projector and computer to communicate both directly or via a wireless network infrastructure. The optional USB wireless adapter supports all IEEE802.11b/g/n networks, and simply slots into place.

Smart Device Control

Plugging the USB wireless adapter into the projector and using our 'Projector Quick Connection' application, projectors can be controlled from a tablet or smartphone.

*Our 'Projector Quick Connection' application can be downloaded from the App StoreSM iPad® application launch date planned for August

Ultra network functions

The Ultra Short Throw range offers flexible networking capabilities. Administrators can conveniently schedule a variety of actions for multiple projectors on the network, including automatic Power On/Off and Centralised Reporting. The clever messenger function also allows messages to be sent to multiple projectors instantly or at a specified time.

Crestron RoomView™ Software

RoomView[™] software provides a custom configurable interface to monitor, manage and control every device in every room remotely from any computer RoomView Connected™ Projector Support Projectors with Crestron inside already connect directly to RoomView Express software. Built-in network connectivity provides instant status and remote technical support so your class or meeting is never interrupted. Broadcast messaging ensures a safe environment. Instructors can schedule all the projectors throughout the facility to turn off at the end of the day, saving energy and preserving lamps.

Network presentations

You can project still or moving images from one or more networked computers. The single PC mode lets you select one computer on the network, while the multi PC mode lets you use up to four computers.

Moderator Control Mode

The moderator controls up to 50 computers (Clients) and can select which computer is projected, up to 4.

* Moderator Control Mode supports LiveViewer 6 (Windows application) only.

Ultra flexibility

Optional table

The Ultra Short Throw projectors are easy to install and flexible to use. With the optional wall mount and table top kit vou can transform any existing whiteboard, wall or table top into a projected surface.

Rooms with awkward ceilings - the Ultra Short Throw projectors can be wall mounted, therefore problems relating to large voids above suspended ceilings are a thing

Shop window Ultra Short Throw Technology

opens up a world of new possibilities in retail and digital signage applications. From shop window installations to maps in airport lounges, images can be projected on to surfaces that were never thought possible.

Rear projection

Ideal for rear projection due to the short throw distance, resulting in a clean and compact space-saving installation.

Get closer to the action

immersive experience by

gaming and videos with no

than ever. Create an

Interactive projectors (Only available on the CP-TW2503EF and CP-TW3003EF

Multiple interactive pens

With up to 4 interactive pens pupils can do more than just watch - they can interact with the onscreen content. Let them enjoy providing answers, showing their understanding and becoming involved in lessons as never before

Multi screen

For larger applications, two projectors can be combined via a single PC for continuous drawing over extended screens.

Windows 8 multi touch

Windows 8 multi touch allow users with touchenabled Windows 8 systems to operate the PC directly from the interactive screen with up to 4 Pens/Touch (optional) including Win8 gesture.

Hands on learning

The CP-TW2503EF and CP-TW3003EF incorporates sensors (sold separately) that detect finger touch activity on the screen area Together with industry leading Hitachi Starboard software, it allows users to annotate and interact with the material presented. Instead of simply showing static images, students and teachers can interact with on screen material as never before, for hands-on interactivity that brings learning to life.

Auto calibration

Auto calibration is completed in 6 seconds with one button press on the remote control.

PC less drawing

PC less IWB mode, allows users to draw directly onto a picture from a document camera and other devices.

There are many photographs and templates stored within the projector, allowing users to draw directly onto pictures and templates without connecting a PC.

*Compatible Solution products include: Wireless Document Camera CS-1WL, Wireless Multifunctional Switcher/Scaler MS-1WL. For further information and specifications please refer to our website www.hi
